

GEOxyz – Topographer/ Land Surveyor

In search of a Topographer / Land Surveyor

As a Topographer / Land Surveyor you will be responsible for topographical surveys.

This involves preparing, planning, installing the survey equipment, calibration, daily reporting, processing data and preparing the final report.

- You provide technical support for other operational projects.
- You give advice and instructions on topography-related matters.
- You will measure existing assets.
- You will mainly be active in hydraulic engineering (quay walls, jetties, civil works, etc.)

What do we expect from you?

- You obtained a degree in surveying or equivalent through experience.
- You have a first working experience.
- You have a good knowledge of Dutch and English, both written and spoken.
- You are a team player, you have a lot of energy and you can work independently and accurately.
- You think along with our clients to obtain the best surveying results.
- You have a driving license (B).
- You are problem-solver and stress-resistant.
- You have knowledge of AutoCAD.

What are we offering?

- a young and dynamic team.
- the opportunity to actively grow within the company.
- A challenging job in a fast-growing environment.
- the chance to work with the latest equipment on different projects and locations.
- a competitive salary.
