

In search of Mobilization Engineer:

The Mobilisation Engineer has amongst others, the following tasks and responsibilities:

- Overall responsibility for mobilization of projects of (offshore) survey vessels
- Working in close conjunction with Project Managers and Vessel crew
- Plan, organize & manage vessel mobilizations to minimize vessel time required for mobilizations
- Make sure operations are carried out safely and in-line with company procedures;
- Align with other departments to manage resources across operations and avoid efficiency loss due to SIMOPS
- Development of commercial budgets and work schedules for mobilization activities;
- Creation and allocation of internal and external work packages;
- Feedback to Survey Manager to keep the company mobilization process updated, including defining inputs, outputs and key stake holder responsibilities
- Mobilization includes installation as well as interfacing & configuration on board, and calibrations & tests in port & ad sea
- Good documentation of the setup & handover towards the vessel
- Technical support during execution phase of the project
- Evaluate points of improvements for future mobilizations

What do we expect from you?

- Min. 3 years of relevant experience
- Bachelor level
- Good written and spoken English
- Knowledge of technical aspects of survey equipment and software is a plus
- Attention for detail and safe working habits

What do we offer you?

- A challenging job in a fast-growing environment
- A good working climate within a young dynamic team
- Attractive remuneration
